STORE AT CHIDESTER

DESTROYED BY FIRE

CAMDEN, Ark., July 9. (Spl.)-The

general merchandise store of W. C. Woodell at Chidester, 18 miles north of

Woodell at Chidester, 18 miles north of here, was destroyed by fire Wednesday. The fire was the result of incendiarism. The store was set on fire Sunday night, but the alarm was given and the fire extinguished before any great damage was done. This fire had gained such headway at the time the alarm was given that it was impossible to save the store.

The stock was valued at \$15,000 with \$7,000 insurance. Mr. Woodell will rebuild the store at once.

COTTON MARKETS

Close Averages Lower, Helped by Unfavorable Trade and Good Crop Reports.

Friday Afternoon, July 9, 1920. Although somewhat irregular, reflect ing adjustment of one or two positions to the price of the spot month, the av-erage of the market at the close today was moderately lower. Sentiment in speculative circles continues to lean toward the bear side, encouraged by toward the bear side, encouraged by the unsatisfactory character of reports from the manufacturing end of trade and the favorable accounts from the fields. Duliness, however, is the most notable feature of the market and sen-timent is apparently ready to be dis-rected have by the developments of weather.

Finals were steady and from 20 points Finals were steady and from 20 points up to 37 down in New York, while New Orleans finished steady and from 5 up to 18 down. In the snot department sales were extremely light, Memphis selling 790 bales, the largest amount of any center in the belt, and quotations were generally lowered. Laverpool did not show any particular feature in the early part of trading and seemed to be guided largely by weather and crop news from this side. Publication of figures on export business in cetton cloths and yarns for the month of June, showing healthy gains over the corresponding month of last liberal, which was not a favorable bit of news to the domestic manufacturers. The report from Manchester today, however, was a poor one showing cloths dull and inactive and yaris easy. However, a late cable from Liverpool to a local exporter said that Manchester was displaying reviving interestin raw material supplies, although it failed to specify whether this was for early shipment or from the new crop. Liverpool futures closed steady and 11 to 20 points to the bad. Spots were mirked down 50 points, fully middling to 26 37d, with sales 3,000 bales. Receipts for the day were 4,000 bales, of which 2,500 were American.

Opening prices were but little changed.

with sales 3,000 bales. Receipts for the day were 4,900 bales, of which 2,800 were American.

Opening prices were but little changed from last night, and for a brief spell held fairly steady, as offerings were limited and some huying was being done by Liverpool and the South. October opened at 32,82c, touched as high as 32,90c, and then gradually soid off to 32,50c, recovering to 32,72c, and then sagging againtoward the close.

The weather map was a good one, though showing some few showers in Texas and cloudiness, which was not favorable for holding the weevil in check. For most of the belt, however, conditions were excellent and there seemed less chance of rains for the next few days. On the weather alone sentiment was bearish, but technical conditions were such as to discourage sellers, as there was not enough new in news from trade centers to justify much increase in the short interest. Besides, the July position was relatively steady and there is fear of trouble if discounts on the fall months should be widened too much.

Thancial difficulties and improving crop conditions are credited with causing the spinners to buy so sparingly, although many of them are facing reduced time and some have already closed down.

In the local market sales were 2,050

NEW YORK COTTON.

NEW YORK, July 3-The cot market showed renewed irregularity market showed renewed irregularity at the opening today, first prices being 21 points higher on the inactive month of September and two points higher to 8 points lower on other positions. So far as could be learned there was only one or two July notices and there was very little business in that posi-tion, but the continued good weather in the South led to selling of new crop months with October easing off to 22.52c and December to 31.03c shortly after the call or 17 to 22 points not lower. Fir-ce calless said Liverpool was lower and becominer to 31.98c shortly after the call or 17 to 22 points not lower. Frince cables said Liverpool was lower under seding of runors of bearish midments crop condition faures.

After selling off to 52 fits for October or about 22 to 35 points not lower on new crop ments the market steadied on covering for over the week-end and there were stight railles but no charge. there were slight railles but no change

there were slight railies but no change in the general news.
Private reports of rains in Texas seemed to help the tene of the market during the middle of the morning and prices showed railies of some 18 to 20 points from the lowest with October selling at 22.82 or within two points of yesterday's closing figures. There was not a great deal of buying aside from covering for over the week-end, however, and the market weakened again late in the morning owing to a renewal of scattering July liquidation. That delivery sold off to 38.45c or 55 points set lower and new crop months showed

Sellers were encouraged by reports of further curtailment of output by mills and by extremely favorable weather in the belt but as the market fell general realizing set in among the shorts and their buying brought about a reaction, so that at the end of the first hour of business the market stood I to Is points under the final prices of yeaterday.

The reaction continued in force until the market was 17 points over to 5 points under the close of vesterday. October selling as high as 32.50c. The forecast of dry weather for practically the entire cotton region brought in new selling under which values gave ground again so that late in the morning the more active months were 22 to 31 points lower than yesterday's final prices.

At the lowest of the day the market stood 27 to 50 points under the final prices of yesterday, July making the widest loss and trading down to 36.10c. Profit taking again became a factor and toward the close the decline amounted to but 2 to 18 points.

Manila Sugar and International Paper denoted further activity of pools and related professional interests at the outset of today's stock market session. Favorities of the steel equipment, oil and motor groups trailed along at fractional advances with some of the prominent rails and shippings Preliminary quotations for exchange on London were slightly reactionary.

Steeds and equipments lost ground at the midday, but coalers developed pronounced strength. Reading made an extreme gain of four points. Delaware, at Lackawanna and Western 8'4 and Jersey Central two points. Houston Oil was the sensational feature, however, extending its advance to is points.

Leading stocks reacted sharply in the final dealings when the rate for call loans rose to 3 per cent. The close System treenlar.

New York.—It has been popular in the past to paint a pleture of Europe in as dark color as possible and the favorite expression was that a general breakdown was imminent. The general breakdown did not materialize and now we get some statements that indicate the reverse, that Europe is recovering rapidly and these statements are made by two vice-presidents of the Guaranty Trust company, who have had opportunity to observe conditions. This removes one of the principal reasons why some of our big men have been bearish ever since the armistice.—Ettelson, T. & M.
